Digitally Supported Arthroplasty Service shortlisted for HSJ Digital Awards 2026

We are delighted to share that our Digitally Supported Arthroplasty Service has been shortlisted for the HSJ Digital Awards 2026 in the category Empowering Patients Through Digital.

Launched in 2022, the service was a unique initiative designed to ensure every patient undergoing elective hip or knee replacement receives consistent, high quality information and support throughout their surgical journey. Since its launch, more than 2,800 patients have been recruited to the platform, with its reach continuing to grow.

The service combines a user-friendly smartphone application with a web based clinical dashboard, creating an innovative digital platform that connects patients and clinicians. This approach supports effective management, timely communication, smarter workflows and improved outcomes before and after surgery.

Being shortlisted is a fantastic achievement and a real testament to the hard work, innovation and commitment of the team. It also reflects the wider contribution of the Division in delivering high quality, patient centred care through digital innovation.

This recognition provides a valuable opportunity to celebrate and showcase the excellent work being undertaken to support our patients.
