Clinical Skills Centre training opportunities

The Clinical Skills Centre would like to remind clinical teams of the wide range of clinical training sessions available within its current portfolio.

An overview of some of the skills on offer is available to view, alongside additional training in the Safer Use of Medicines, Medicines Errors and Human Factors, and Core Skills programmes for Clinical Support Workers. The team also delivers New to Trust programmes designed to support experienced staff who are new to WUTH.

The Clinical Skills Centre works closely with teams to support learning and development that meets service needs and supports safe, high quality patient care.

If you would like further information or wish to discuss training opportunities for your team, please contact the Clinical Skills Centre to find out how they can support you.

CLINICAL SKILLS CENTRE
