

Date: 26<sup>th</sup> February 2026

### IV Access refresher videos now available on the intranet

The IV Access team have developed a series of refresher videos for staff who have already completed IV Access training.

These videos are designed to support ongoing competence and confidence by revisiting key principles, techniques and best practice. They provide a convenient way for colleagues to refresh their knowledge and maintain safe standards in clinical practice.

All videos have now been uploaded to the intranet and are available to view online.

Colleagues can access the videos via the [IV Access section of the intranet](#).
