Congratulations to Graeme Lambert - Employee of the Month for Support Services

Congratulations to Graeme Lambert, Clinical Lead for Therapy Services, who has been recognised as Employee of the Month for Support Services.

Graeme has been nominated for his leadership in successfully implementing ERoster across Therapy teams, a project that has been requested for many years and is now delivering clear benefits for staff and services.

Through his work, teams now have improved visibility of staffing, with colleagues commenting on how much easier it is to see who is on shift and when team members are next in. The implementation has also supported better oversight of staff availability and planning across services.

Graeme has led this work across multiple teams, working closely with the ERoster team and supporting engagement across both Wirral University Teaching Hospital and Wirral Community Health and Care NHS Foundation Trust. He has adapted his approach to meet the needs of different teams, supporting colleagues who were less confident with digital systems while encouraging others to embrace new ways of working.

The project has not been without its challenges, particularly in aligning different processes across organisations. Graeme has shown determination and resilience in overcoming these obstacles and continues to provide ongoing support and expertise to ensure ERoster is used effectively.

This achievement comes alongside the demands of his role as Clinical Lead, reflecting his commitment to service improvement and supporting colleagues.

Graeme's dedication, leadership and willingness to go above and beyond have made a lasting impact, and this recognition is thoroughly deserved.
