Library literature search service available

Are you developing a guideline, undertaking an audit, introducing a new service or carrying out clinical research?

The library team offers a literature search service to support colleagues across the Trust. This service can help save time and provide access to high quality, evidence-based information to support a wide range of needs.

Whether you are looking for information to support patient care, stay up to date with current practice, plan services or inform decision making, the library team can help.

The service is open to all staff.

To request a literature search, please email wuth.library@nhs.net or complete the [online request form](#).

The team will work with you to understand your requirements and provide tailored results to support your work.
