Take part in clinical trial research

Colleagues are invited to support the development of future treatments by taking part in clinical research.

The Medicines Evaluation Unit (MEU) in Wythenshawe, Manchester is currently seeking volunteers to take part in clinical trials. Studies are available for people with conditions such as asthma, COPD, eczema and psoriasis, as well as for healthy volunteers who are not taking regular medication.

All studies are ethically approved and conducted in line with strict regulatory standards, ensuring safety and quality throughout.

Participants may receive compensation for their time, along with reimbursement of travel expenses, depending on the study.

Taking part in research is an opportunity to contribute to the development of new treatments that could benefit patients in the future.

To find out more or register your interest, please visit the [MEU website](#).
