

Date: 11th June 2026

**Free webinar: Understanding Executive Function and
decision making under the Mental Capacity Act**

Colleagues are invited to join a free one-hour webinar exploring executive function and how difficulties in this area may impact capacity and decision making under the Mental Capacity Act 2005.

Executive function refers to the cognitive skills we use every day to manage tasks and activities, including planning, focusing attention, remembering instructions, adapting to changing situations, solving problems and managing multiple priorities.

The webinar will explore how impairment in executive functioning may affect a person's ability to make decisions and how this can influence assessments undertaken under the Mental Capacity Act 2005.

Delivered by Bevan Brittan, the session offers an opportunity to develop understanding of an important area relevant to assessment, decision making and patient care.

The session is free to attend and takes place on Thursday 25th June 2026 and will last one hour.
