Help shape WUTH's Green Travel Plan

The Trust is currently developing and updating its Green Travel Plan and would like to hear from colleagues about their current travel habits, the challenges they face when travelling to and from work, and their views on more sustainable travel options.

Your feedback will help the Sustainability Team to:

- Understand how colleagues currently travel to work and between Trust sites
- Identify opportunities to support active travel, including walking and cycling
- Gather feedback on public transport and any barriers staff experience
- Assess interest in electric vehicles and the potential demand for workplace EV charging infrastructure
- Inform future travel initiatives that support staff wellbeing, reduce carbon emissions and improve sustainability across the Trust

The survey takes just a few minutes to complete and all responses will be reviewed in aggregate to help identify trends and priorities.

Please complete the survey by Friday 24th July 2026.
